Here is Mr. Strickhaud's account of the civil Posse I ask my readers to compare it with Mr Meintire a account, which I have also inserted It will be seen that they disagree in toto If Mr Mclatire's account of it is right, then Mr Strickland a must be wrong. The Statements that he made in relation to the stand made by the 300 trespaggers on the Arocatook, and the manner in which they were et inpelled to retire, which statement in lact," must have been the principal reason for calling out the reinforce ment is without sufficient foundation. In proof of this assertion we have the certificate of the Land Agent, "that no hostile indications were discover ed on the river, until the posse had reached letter G, which is the next township but one to the line of the State This statement of Mr Strick land in relation to the stand made by the trespassers on the Aroostook was as I have said above, the reason of reading the additional force, for if what he styred was true, there certainly existed a necessity of a worst efficient action. When 300 men are themselves and combine logether to respect be civil authorities, no half way policy should be adopted, and if the reports had been correct the Governor would have been censprable, only for calling out a civil instead of a military force to put down the insubordination . The story which Mr Strickland told about the posse expecting an attack in care that any attempt should be made by them to carry out the resolves of the 24th of January, and that the number of trespassers would be constantly augmenting," were entirely without foundation. They were hobgoblins conjured up by his own frightful imagination. When the pora were at No 10, there existed no more concert or determination along the trasprosets the present exists among the good citizene of this city, to resist the city Marshal in the ser-

One cent's worth of Charcoal is sufficient to keep it in operation one day. As an article for summer use, it will be found indispensable, as the heat is all kept within the Baker; and the baking is done by reflection from the cylinder, thereby enshing one-to-do-cook ing without the addition of a great fire either in a stove or fire place.
